

Hip & Knee Replacement Aids

Corporate Autoworks is always trying to find ways to help its loyal customers. Michael has had both hips replaced and as a result, has most of the life aids that a hip or knee replacement needs. But he, hopefully, will not need them again, so we lend them out to ongoing customers for their use after hip or knee replacement.

Corporate Autoworks has the following equipment available:

1) Two walkers. One is the type recommended by hospitals. It typically does not have wheels (though they can be added). The second is a mobility walker with four wheels, brakes and a seat.

2) Elevated toilet seat

3) Sock putter on er. (If anyone knows the technical name of this item, please let us know). It assists in putting on socks.

4) Grabber stick for picking things off high shelves or the floor.

5) Walking cane

6) Crutches

7) Bath Chair

There is no charge for the use of any of these. All we ask is that they be returned promptly when no longer needed, in clean condition.
